

REMARKS/ARGUMENTS

In response to the Examiner's final Office Action of November 30, 2007 the Applicant respectfully submits the accompanying Amendment of the claims and the following Remarks.

Regarding Amendment

In the Amendment:

independent claim 1 is amended to specify that the claimed processor is configured to determine operation parameters of the printer and to configure the printer to print the wallpaper in accordance with the determined operation parameters and operator inputs. Support for this amendment can be found, for example, at page 42, line 29-page 43, line 2 of the present specification; and

dependent claims 8, 9, 14, 21-31, 40, 44, 45, 47 and 48 are unchanged.

It is respectfully submitted that the Amendment does not add any new matter to the present application, nor any new issues to the prosecution of the present application.

Regarding 35 USC 103(a) Rejections

It is respectfully submitted that the subject matter of amended independent claim 1, and claims 8, 9, 14, 21-31, 40, 44, 45, 47 and 48 dependent therefrom, is not taught or suggested by any one or more of previously cited Martin, Silverbrook and Hashi in view of newly cited Okada et al. (JP 07-156496), because none of these cited references teach or suggest printing wallpaper in accordance with monitored operation parameters of the printer.

It is respectfully submitted that the Examiner's rejections have been traversed. Accordingly, it is submitted that the present application is in condition for allowance and reconsideration of the present application is respectfully requested.

Very respectfully,

Applicant/s:
